It is SF with an account number so ESAT could log these in. Check with Kevin to see if he plans to log in any of these since they are critical as far as timing goes.

Cindy,

Is this Marcellus Shale? Then will need separate funding for ESAT unless it is Superfund. ESAT usually performs all of the SF sample log-in. Please let me know.

Thanks!!!!!!!!!!!!

For an update on the Dimock analysis planning, see the following. Once again, it's still draft for now.

Subject: Status of Dimock GW Site

All,

Our branch has been actively involved with the sampling plan for the Dimock GW Site (Marcellus Shale residential well sampling). For those of you working on this, thank you very much for your time and energy in meeting the demands of this project! Here's a status for everyone.

Note: All documents are stored in ASQAB\_AT/Special Projects/Marcellus Shale/Dimock.

### **Ex. 5 - Deliberative**

We have finalized the parameter list and have labs assigned. Here is a link to that table [attachment "Shortcut to Dimock Parameters and Labs Jan06 2012.xlsx.Ink" deleted by Fred Foreman/ESC/R3/USEPA/US]

An analytical request form is in progress but has not officially been submitted for Kevin to route.

**Ex. 5 - Deliberative**

**Ex. 5 - Deliberative**

To help track our efforts we have a summary report. Here is a link to that summary. [attachment "Shortcut to Dimock Groundwater Site\_Lab Efforts Summary\_Jan 06 2012.docx.Ink" deleted by Fred Foreman/ESC/R3/USEPA/US]

Analytical work will be done by three Regions (R2, R3, and R9), NAREL (rad work), and commercial labs (Tier 4 - micro and Isotech methods).

## **Ex. 5 - Deliberative**

When we receive notice that the project will begin we will have a special sample scheduling meeting.

If you have any further questions please contact Stevie or me.

Cindy
